

YEAR 6 SPRING TERM 1 2022

THE CARIBBEAN

We are aiming to teach our English and Geography lessons all based around the topic title The Caribbean. If you would like to help your child, please encourage them to go to the local library or use the Internet at home to find out information to support the work we are covering in school.

Some of the things we will be investigating during our English and Geography lessons are:

- Jamaican poetry
- Anansi Stories
- Biographies and autobiographies of famous Caribbean people
- Tourist information leaflets
- Factual and persuasive writing about animals on the islands
- Presentations based on a Caribbean island researched by the children.
- Caribbean styles of music and dance
- Studying the physical and human geography of the Caribbean

Maths

Please ensure your child knows and practises their times tables from 1 - 12 as a lot of number topics rely on this knowledge. Homework to be returned on Thursdays.

Multiplying and dividing decimals; converting between fractions, decimals and percentages; finding percentages of an amount; solving simple algebraic equations; converting metric measurements.

Science

Topic 'Let it Shine'

We will be studying: how light travels in straight lines, light sources, reflection, how we see things and explaining shadows.

PE kits: indoor Tuesday.

Outdoor (come to school dressed in kit) Friday.
